JAVA

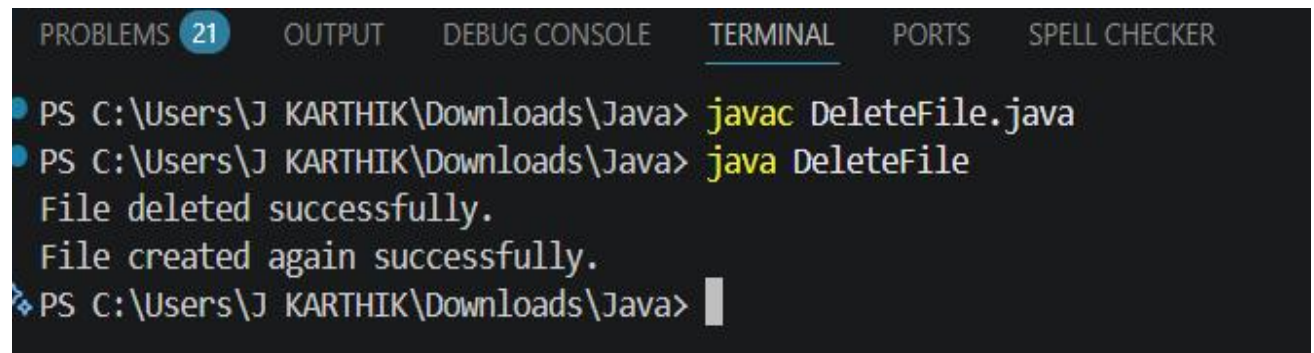

Q5 Delete a file , if exist

create a program to delete the file if exist, and create again.

Program:

```
DeleteFile.java > Java > DeleteFile > main(String[] args)
1  import java.io.File;
2  import java.io.IOException;
3
4  public class DeleteFile {
    Run main | Debug main | Run | Debug
5      public static void main(String[] args) {
6
7          File file = new File(pathname: "data.txt");
8
9          try {
10             if (file.exists()) {
11                 if (file.delete()) {
12                     System.out.println(x: "File deleted successfully.");
13                 }
14             } else {
15                 System.out.println(x: "File does not exist.");
16             }
17
18             if (file.createNewFile()) {
19                 System.out.println(x: "File created again successfully.");
20             }
21
22         } catch (IOException e) {
23             System.out.println("Error: " + e.getMessage());
24         }
25     }
26 }
```

Output:

The screenshot shows an IDE interface with a terminal window. The terminal has tabs for PROBLEMS (21), OUTPUT, DEBUG CONSOLE, TERMINAL (selected), PORTS, and SPELL CHECKER. The terminal output shows the following commands and results:

```
PS C:\Users\J KARTHIK\Downloads\Java> javac DeleteFile.java
PS C:\Users\J KARTHIK\Downloads\Java> java DeleteFile
File deleted successfully.
File created again successfully.
PS C:\Users\J KARTHIK\Downloads\Java>
```
