JAVA

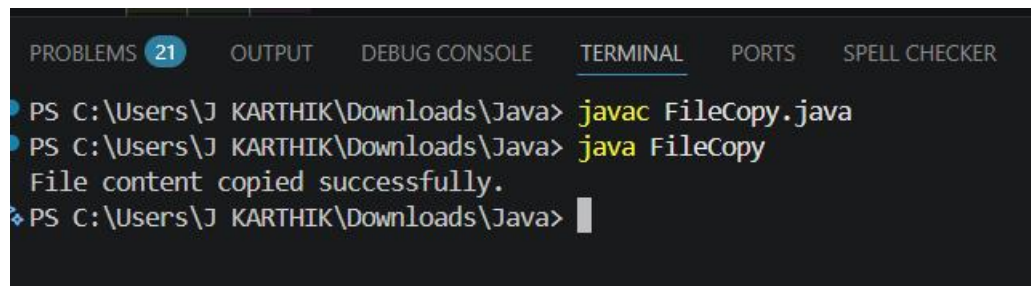

Q3 Copy the content from source to destination using BufferedReader and BufferedWriter

create a program to copy the content from a file.

Program:

```
FileCopy.java > Java > FileCopy > main(String[] args)
1  import java.io.BufferedReader;
2  import java.io.BufferedWriter;
3  import java.io.FileReader;
4  import java.io.FileWriter;
5  import java.io.IOException;
6
7  public class FileCopy {
8      Run main | Debug main | Run | Debug
9      public static void main(String[] args) {
10
11          try {
12              BufferedReader reader = new BufferedReader(
13                  new FileReader(fileName: "source.txt"));
14              BufferedWriter writer = new BufferedWriter(
15                  new FileWriter(fileName: "destination.txt"));
16
17              String line;
18
19              while ((line = reader.readLine()) != null) {
20                  writer.write(line);
21                  writer.newLine();
22              }
23
24              reader.close();
25              writer.close();
26
27              System.out.println(x: "File content copied successfully.");
28
29          } catch (IOException e) {
30              System.out.println("Error: " + e.getMessage());
31          }
32      }
33  }
```

Output:

A screenshot of an IDE terminal window. The terminal has a dark background with light-colored text. At the top, there is a tab bar with several tabs: 'PROBLEMS' (with a blue circle containing the number 21), 'OUTPUT', 'DEBUG CONSOLE', 'TERMINAL' (which is selected and underlined), 'PORTS', and 'SPELL CHECKER'. Below the tab bar, the terminal shows three lines of command-line input and output. The first line is a command to compile a Java file. The second line is a command to run the compiled file, followed by the output message 'File content copied successfully.' The third line is a new command prompt waiting for input.

```
PS C:\Users\J KARTHIK\Downloads\Java> javac FileCopy.java
PS C:\Users\J KARTHIK\Downloads\Java> java FileCopy
File content copied successfully.
PS C:\Users\J KARTHIK\Downloads\Java> 
```
