JAVA

Q1 File Creation

1. create a program to create a file and write the data .

Program:

```
FileCreation.java > Language Support for Java(TM) by Red Hat > FileCreation > main(String
1  import java.io.File;
2  import java.io.FileWriter;
3  import java.io.IOException;
4
5  public class FileCreation {
6      Run main | Debug main | Run | Debug
7      public static void main(String[] args) {
8          try {
9              File file = new File(pathname: "data.txt");
10
11              if (file.createNewFile()) {
12                  System.out.println(x: "File created successfully.");
13              } else {
14                  System.out.println(x: "File already exists.");
15              }
16
17              FileWriter writer = new FileWriter(file);
18              writer.write(str: "Welcome to Java File Handling.\n");
19              writer.write(str: "This is a File Creation program.");
20              writer.close();
21
22              System.out.println(x: "Data written successfully.");
23
24          } catch (IOException e) {
25              System.out.println(x: "An error occurred.");
26          }
27      }
28  }
```

Output:

```
PROBLEMS 21 OUTPUT DEBUG CONSOLE TERMINAL PORTS SPELL CHECKER
• PS C:\Users\J KARTHIK\Downloads\Java> javac FileCreation.java
• PS C:\Users\J KARTHIK\Downloads\Java> java FileCreation
File already exists.
Data written successfully.
❖ PS C:\Users\J KARTHIK\Downloads\Java> |
```
