JAVA

Q2 Read and Write using FileReader FileWriter Class

create a program to read the content and display on the console

Program:

```
FileReadWrite.java > Java > FileReadWrite > main(String[] args)
1  import java.io.FileReader;
2  import java.io.FileWriter;
3  import java.io.IOException;
4
5  public class FileReadWrite {
    Run main | Debug main | Run | Debug
6      public static void main(String[] args) {
7
8          try {
9              // Write data to file
10             FileWriter writer = new FileWriter(fileName: "data.txt");
11             writer.write(str: "Welcome to Java File Handling.\n");
12             writer.write(str: "This is FileReader and FileWriter example.");
13             writer.close();
14
15             FileReader reader = new FileReader(fileName: "data.txt");
16
17             int ch;
18             System.out.println(x: "File Content:");
19
20             while ((ch = reader.read()) != -1) {
21                 System.out.print((char) ch);
22             }
23
24             reader.close();
25
26         } catch (IOException e) {
27             System.out.println(x: "An error occurred.");
28         }
29     }
30 }
```

Output:

```
PROBLEMS 21 OUTPUT DEBUG CONSOLE TERMINAL PORTS SPELL CHECKER
PS C:\Users\J KARTHIK\Downloads\Java> javac FileReadwrite.java
PS C:\Users\J KARTHIK\Downloads\Java> java FileReadwrite
File Content:
Welcome to Java File Handling.
This is FileReader and FileWriter example.
PS C:\Users\J KARTHIK\Downloads\Java>
```
